

# Israeli Cultural Heritage Materials and the UNESCO Memory of the World Project

Elhanan Adler

Chairperson - Israel Memory of the World Committee

The Unesco Memory of the World Programme seeks to increase awareness of the importance to documentary cultural heritage materials and the need for their preservation and accessibility. UNESCO maintains a register of heritage materials of universal importance in which four Israeli collections or items are currently listed. The Israel Memory of the World Committee of the Israel National Commission for UNESCO recommends documentary heritage for the international register and is preparing to create and maintain a national register of important Israeli documentary heritage materials.
