The Friedberg Project for Talmud Bavli Variants – "Hachi Garsinan"

Prof. Yaacov Choueka, Dr. Menachem Katz, Dr. Roni Shweka

The Friedberg Project

The Friedberg Project for Talmud Bavli Variants is developing a site that upon its completion will display all variant-readings of any given portion of the Talmud Bavli. The project will encompass all Talmud Bavli textual witnesses, and will display them by column synopsis as well as by row synopsis, dynamically, enabling the user much freedom in choosing which variants to display. The first version of the project included all Genizah fragments. The new presented version includes all the early printing editions as well.
