

The Digitisation Program of the Central Zionist Archive

Rochelle Rubinstein

Central Zionist Archive Deputy Director for Archives

CZA at wzo.org.il

Over the years, the Central Zionist Archive completed a number of digitization projects that aim to provide access to its vast resources and to reduce over-handling of the material. This process took place alongside an attempt to preserve the specifically archival nature of the material's arrangement and provide the necessary search tools. The presentation will aim to outline the nature of the various digitization projects, the difficulties, the effects, and future plans. See: <http://www.zionistarchives.org.il/>
