

From MANA to EUROPEANA – Technical Process Flow

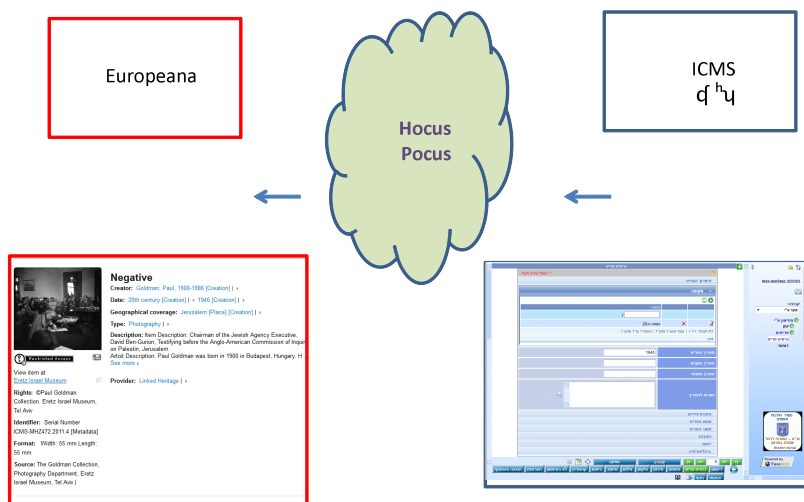

Mariane Aaron

Uploading items to Europeana, through real-life example of Eretz Israel Museum

In August 2012 the Israeli Ministry of Culture conducted its first steps by uploading more than 300.000 items to Europeana. We will explain this process using the Eretz Israel Museum as an example.

The main steps of the process are:

1. Museum selects the "best" items to be published
2. Items are extracted to an Excel report, within ICMS
3. Files are parsed to a format suitable for input to Europeana
4. Items are uploaded to Europeana using Ingestion Tool
5. Items are viewable in Europeana web site (not available yet)

Process
