Mantis Vision Ltd. is the leading developer and producer of user-centric 3D content creation solutions. Its flagship product, the MVC-F5 3D imager, is the only hand-held imager available today specifically designed and proven to meet the challenging demands of non-professional field users. The MVC-F5's proprietary technology enables real-time, precise 3D modeling of highly dynamic, cluttered, complex and hard to reach objects and scenes, in seconds to minutes.
