

“Genealogy in the Age of Technology”

Garri Regev, President IGRA

Organization: Israel Genealogy Research Association (IGRA)

www.genealogy.org.il

The Israel Genealogy Research Association (IGRA) is reaching out to a global membership and sharing resources with both those interested in locating records and information on relatives in Israel and helping those in Israel interested in researching their families all over the world.

We have taken the traditional Genealogy Society and given it a twist.

Here is an exciting project bringing together our combined experience in the field and the new advances of technology.
